

Connecting the Track power receiver

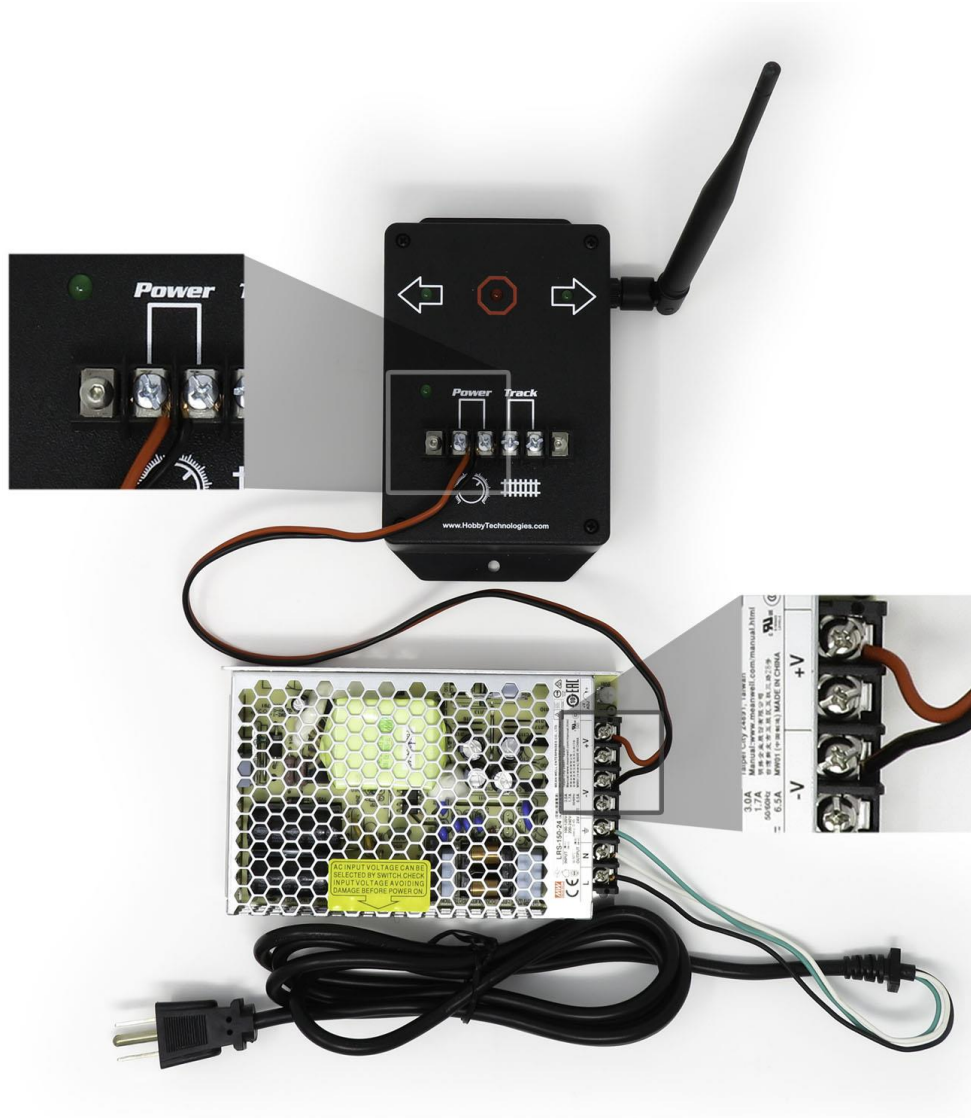

Connecting the track power receiver is simple. In this document we will cover how to connect a +24V DC power supply and an existing train track transformer.

Connecting the track power receiver using a +24V DC power supply

Step 1

(warning: please make sure power supply is not plugged in to power before commencing to wire the track power receiver)

Connect one end of a cable to V+ and V- of the power supply

Connecting the Track power receiver

Step 2

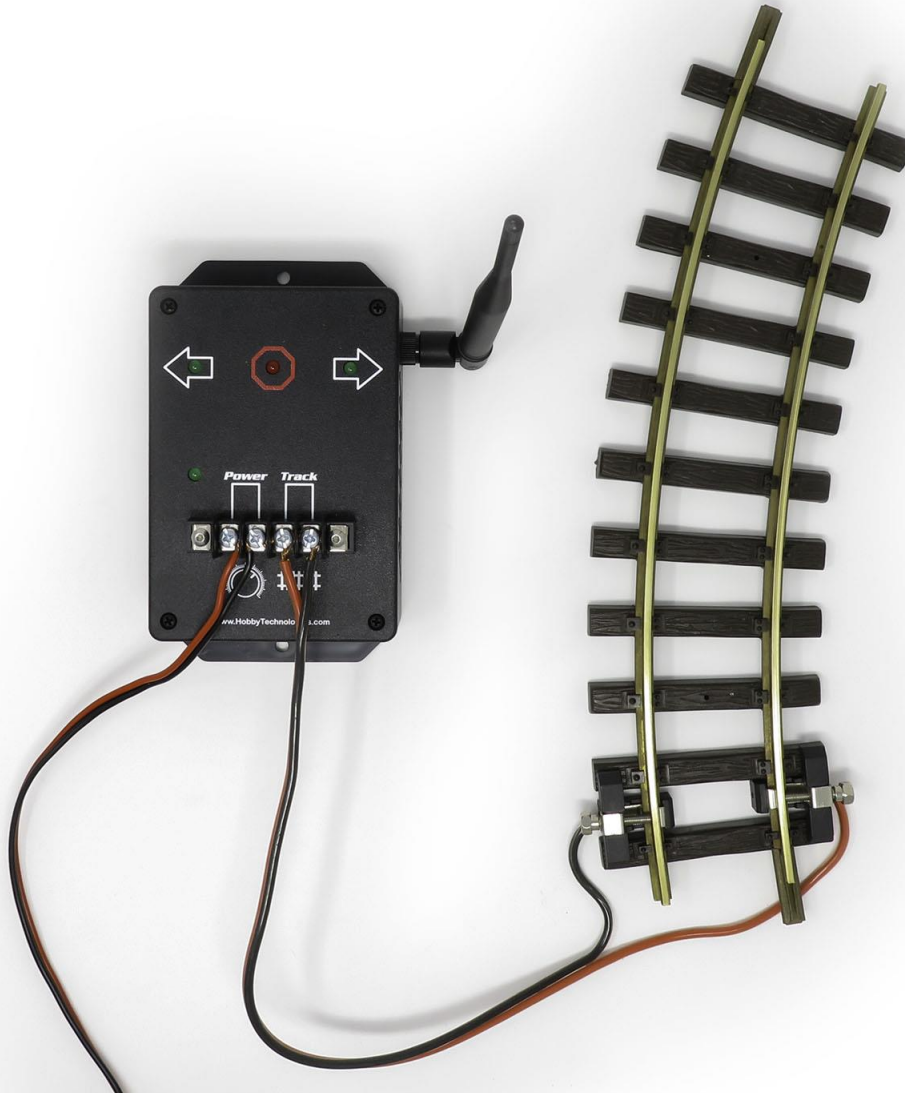

Connect the other end of the cable to the track power receiver to the power section of the terminals

Connecting the Track power receiver

Step 3

On the track power receiver connect a new cable to the side labeled "Track"

Connecting the Track power receiver

Step 4

Connect the other end of the cable to the train track
